SALESFORCE INTEGRATION TRAINING PROGRAM

Course Overview

Almost every Salesforce project connects to other systems: ERPs, payment gateways, Jira, websites and data warehouses. Developers who can build secure, reliable integrations are among the highest-paid Salesforce professionals.

This course is the next step after our Salesforce Developer (Apex) course. It covers integration patterns, APIs, modern authentication with External Client Apps, callouts, events and bulk data, and ends with real Salesforce-to-Jira and ERP integration projects.

DURATION
Varies by batch – ask us

CURRICULUM
10 modules

FORMAT
Live online, instructor-led

BATCHES
Weekday and weekend

LEVEL
Intermediate (after Apex)

CERTIFICATE
SifCore certificate

What you will learn

- Choose the right integration pattern for each business need
- Use Salesforce REST, SOAP, Composite and Bulk APIs
- Secure integrations with OAuth, External Client Apps and Named Credentials
- Call external systems from Apex with REST and SOAP
- Expose your own Apex REST and SOAP services
- Build real-time integrations with Platform Events and Change Data Capture
- Load and sync large data volumes with Bulk API 2.0
- Test, monitor and harden integrations with retries and logging

SALESFORCE INTEGRATION TRAINING PROGRAM

9 in 1 Course

Everything you get when you join SifCore, in one course.

01

Training

Live online, instructor-led interactive sessions.

02

Projects

Real Jira and ERP integration projects you can show in interviews.

03

Internship

Internship assistance to gain practical experience of what you learn.

04

Placement

Placement assistance for 1 year after successful course completion.

05

Certification

SifCore certificate plus an overview of the Salesforce Platform Integration Architect path.

06

E-learning access

LMS access with class recordings, study material, assessments and more.

07

Bootcamps

Regular bootcamps spread over the next 12 months.

08

Hackathons

Take part in SifCore hackathons and competitions, absolutely free.

09

Membership

1-year premium membership of SIFCORE ERP Academy with Salesforce Development course enrolment.

Who it's for

Who should join

- SifCore Salesforce Developer (Apex) course graduates
- Salesforce developers moving into integration work
- Java, .NET or API developers working with Salesforce
- Technical consultants who design connected systems

Career paths

- **Salesforce Integration Developer**
- **Salesforce Developer**
- **Integration Consultant**
- **MuleSoft / API Developer (entry level)**

SifCore LaunchPad: career support from day one

01	02	03	04	05
Learn	**Build**	**Practice**	**Prepare**	**Launch**
Live instructor-led classes	Real-world projects	Free batch repeat	Resume and LinkedIn makeover	Placement assistance
Class recordings and LMS access	Internship / project letter	SifCore certificate and exam guidance	Mock interviews with feedback	Alumni community and job updates

We provide placement assistance, not guaranteed placement. Jobs depend on your skills and interviews.

Learning & Career Benefits

Learning benefits

01 Understand the integration patterns used on real Salesforce projects.

02 Work with REST, SOAP, Composite and Bulk APIs.

03 Set up secure authentication with OAuth, External Client Apps and Named Credentials.

04 Build outbound callouts and inbound Apex services.

05 Build real-time integrations with Platform Events and Change Data Capture.

06 Make integrations reliable with retries, logging, testing and monitoring.

Career benefits

01 Move into integration work, one of the best-paid Salesforce skills.

02 Show a GitHub portfolio with Jira and ERP integration projects.

03 Answer real interview scenarios on OAuth, callouts and events.

04 Become eligible for Salesforce Integration Developer and Integration Consultant roles.

05 Show your SifCore certificate on your resume and LinkedIn, and plan your path to the Integration Architect credential.

Learn it. Apply it. Grow with it.

Every module is practised on a real Salesforce org, so you build skills employers can see.

Course Curriculum

Phase 1 | Integration foundations · Modules 1–3

01 Integration fundamentals & patterns

- Why businesses integrate Salesforce: ERP, payments, Jira, websites
- Synchronous vs asynchronous integration
- Batch data sync and remote call-in
- Choosing a pattern and the system of record
- HTTP, JSON and XML basics
- Request and reply; fire and forget
- Data virtualization and UI updates from data changes

02 Salesforce APIs

- REST API: records, queries and describe calls
- Composite API: several calls in one request
- API versions and API limits
- SOAP API: enterprise and partner WSDLs
- Bulk API 2.0 and Pub/Sub API: an overview
- Testing APIs with Postman and Workbench

03 Authentication & security

- OAuth 2.0 basics: tokens, scopes and refresh
- External Client Apps (the replacement for new Connected Apps)
- Named Credentials and External Credentials
- Integration users and least-privilege permission sets
- Flows: web server with PKCE, JWT bearer, client credentials
- Connected Apps in existing orgs
- Remote Site Settings and trusted URLs

Course Curriculum

Phase 2 | Callouts, services & real-time data · Modules 4–7

04 Apex callouts (outbound)

- HttpRequest and HttpResponse
- GET, POST, PATCH and DELETE callouts
- Serializing and parsing JSON; JSON to Apex classes
- SOAP callouts with WSDL2Apex
- Callouts with Named Credentials
- Callouts from triggers using Queueable Apex
- Continuation for long-running callouts
- Callout limits and timeouts

05 Exposing Salesforce services (inbound)

- Apex REST services with @RestResource
- @HttpGet, @HttpPost, @HttpPatch and @HttpDelete
- Apex SOAP web services
- Request and response wrapper classes
- Versioning your APIs
- Securing inbound APIs with permission sets
- Testing inbound services with Postman

06 Composite API, External Services & Salesforce Connect

- Composite, batch and tree requests
- sObject Collections for bulk record calls
- External Services from OpenAPI specs
- Calling External Services from Flow without code
- Salesforce Connect and External Objects (OData)
- When to virtualize data vs copy it
- Outbound Messages in older orgs

07 Event-driven integration

- Platform Events: design, publish and subscribe
- High-volume events and replay
- Change Data Capture for record changes
- Pub/Sub API for external subscribers
- Handling event errors and retries
- Choosing events vs callouts

Course Curriculum

Phase 3 **Data, reliability & projects** · Modules 8–10

08 Bulk data & large data volumes

- Bulk API 2.0 ingest and query jobs
- Upserts with external IDs
- Large data volumes and data skew
- Data Loader and Salesforce CLI data commands
- Scheduled sync jobs with Batch Apex
- Data quality and duplicate handling

09 Error handling, monitoring & testing

- Retry strategies and idempotent design
- HttpCalloutMock and WebServiceMock
- Monitoring API usage and limits
- Deploying integration settings and credentials
- An error logging framework for integrations
- Testing inbound REST services
- Debug logs for integrations

10 Middleware & integration projects

- When to use middleware
- Project: real-time Salesforce–Jira issue sync
- Publishing your code on GitHub as a portfolio
- Integration interview questions, resume and LinkedIn
- MuleSoft Anypoint: an overview
- Project: order sync with an external ERP using REST and Platform Events
- Salesforce Certified Platform Integration Architect: an overview

Hands-on with real APIs, Postman and a live Salesforce org

Build every integration against real endpoints, test it in Postman, and finish with Jira and ERP projects you can show in interviews.

Tools & Technologies

The tools you will use hands-on throughout the course.

- **Postman**
- **Workbench**
- **VS Code**
- **Salesforce CLI**
- **Data Loader**
- **MuleSoft Anypoint (overview)**
- **Jira**
- **Git & GitHub**

Real projects

Apply each phase to a practical project you can show in interviews.

Industry trainers

Learn live from trainers with real Salesforce experience.

Career support

Resume, LinkedIn, mock interviews and placement assistance.

Hands-on with real APIs, Postman and a live Salesforce org

Build every integration against real endpoints, test it in Postman, and finish with Jira and ERP projects you can show in interviews.

SALESFORCE INTEGRATION TRAINING PROGRAM

Learning Journey

Your phase-by-phase path from Salesforce basics to your first Salesforce role.

1

Phase 1: Integration foundations (Modules 1–3)

Integration fundamentals & patterns · Salesforce APIs · Authentication & security

2

Phase 2: Callouts, services & real-time data (Modules 4–7)

Apex callouts (outbound) · Exposing Salesforce services (inbound) · Composite API, External Services & Salesforce Connect · Event-driven integration

3

Phase 3: Data, reliability & projects (Modules 8–10)

Bulk data & large data volumes · Error handling, monitoring & testing · Middleware & integration projects

4

Career launch (SifCore LaunchPad)

Resume and LinkedIn makeover · Mock interviews with feedback · Placement assistance and job updates

Start your journey with a free live demo class.

Meet the trainer, see how classes work and get a personalised plan from our counsellor.

TRAINING CERTIFICATION

Earn your certificate

Complete the course and get your SifCore certificate, ready to add to your resume and LinkedIn profile.

SifCore course certificate

Awarded when you successfully complete the course. Each certificate carries a unique certificate number.

Certification exam guidance

Our trainers guide you on preparing for the official exam. Exams are booked and paid for directly with the certifying body.

Salesforce Certified Platform Integration Architect (overview)

STUDENT REVIEWS

What our students say

4.8 ★★★★★
Based on 61 Google reviews

Tahir Hussain
Salesforce Admin & Development student

★★★★★

I joined Sifcore for the Salesforce course and overall my experience has been really good. The course is well structured and covers both Admin and Development (Apex, LWC, integrations). The best part is the practical approach — you actually work on real-time projects, which helps a lot in understanding how things work in real jobs. Trainers are supportive and mock interviews + resume guidance helped me gain confidence.

Avinash Chand
Salesforce Developer student

★★★★★

I completed the Salesforce Developer course at Sifcore Institute, and it was a great learning experience for me. The training was practical and easy to understand, especially topics like Apex, Triggers, SOQL, and Lightning Web Components. The trainer was supportive and always ready to clear doubts.

Deepak Kumar
Salesforce student

★★★★★

I joined SIFCORE Institute for the Salesforce course, and it turned out to be a good learning experience. The teaching is practical and easy to follow, and the trainers explain concepts with real-time examples. Classes are well-managed, and the small batch size makes learning more comfortable.

Shruti Harshit
Career switcher · now in a Salesforce role

★★★★★

I was looking for a career change and joined SIFCORE to learn Salesforce. The course gave me a good technical foundation, and the career team helped me prepare for interviews. I have now started my new role in Salesforce.

QUESTIONS

Frequently asked questions

How long is the Salesforce Integration course?

The duration depends on the batch you choose. Weekday and weekend batches are available. Book a free demo or WhatsApp us for the current schedule.

What do I need to know before joining?

Apex basics, or our Salesforce Developer course. We cover HTTP and JSON basics in the first module.

Do I need my own Jira or ERP account?

No. We use free developer accounts and sample endpoints, and the trainer guides you through the setup.

Are the classes live or recorded?

All classes are live and online with a trainer. You also get class recordings and LMS access, so you can revise any session.

Which certification does this course prepare me for?

It gives an overview of the Salesforce Certified Platform Integration Architect credential, an advanced certification that usually needs project experience. You receive a SifCore course completion certificate.

Do you guarantee a job after the course?

No. We provide placement assistance, including resume and LinkedIn support, mock interviews and job updates, but we do not guarantee placement. Jobs depend on your skills and interviews.

What are the course fees?

Fees depend on the batch and any current offer. Book a free demo or WhatsApp us for the latest fees.

Still unsure? Talk to our counsellor in a free demo class.

Call or WhatsApp +91 99907 77206 for batch dates, fees and current offers.
